

docufide receiver™

FOR ASSOCIATIONS & NONPROFITS

Request, Receive, Analyze

Docufide® Receiver provides a web-based (SaaS) solution for associations and other non profits to request, receive and analyze electronic transcripts. The solution reduces the cost and effort of receiving and processing education records without disrupting existing application processes.

Fully secure and FERPA compliant, Docufide Receiver connects you to any higher education institution and/or credential issuing organization for streamlined electronic transcript exchange.

Docufide Receiver enables Associations and Nonprofits to trust that all institutions sending transcripts are proven senders of official education records.

Transform academic transcripts into critical data to streamline the application process.

Attract Candidates by Improving the Application Process

Provide the best support for your candidates by making the document gathering and sending process extremely simple using Docufide Receiver. One click on a button incorporated into the online application will initiate the request and delivery of their education records.

Candidates can track the request and delivery process through an online portal and via email notifications, providing them peace of mind that their documents are safely on their way.

Make Requesting Transcripts Simple!

You can embed this button

on your website for candidates to request their transcript automatically!

Choose Docufide Receiver to:

- Dramatically reduce application processing time.
- Enhance candidate experience by integrating transcript request into your online application.
- Automate the delivery of transcript data into your database, and leverage it to improve candidate assessment.
- Analyze candidate and transcript data to improve candidate recruitment.
- Eliminate costly and time-consuming processes by bringing the receiving and analysis of transcripts completely online.
- Take advantage of Docufide's network of over 8000 sending institutions.

Docufide Receiver streamlines transcript request and receive processes with features and capabilities such as:

- **Easy Transcript Request:** Candidates submit transcript requests online from your application workflow.
- **Transcript Tracking:** Full transcript tracking for candidates and staff from request to confirmed receipt.
- **Auto Delivery (SFTP/Web Services):** Auto-receive transcripts to secure FTP location or via web services to your database.
- **Multiple Data Formats:** Take advantage of flexibility in receiving transcripts as PDF, TIF, or data (PESC XML).
- **Secure Private Library:** Easily retrieve and analyze all past transcripts via your private archive library.
- **Reporting:** Gain insight into transactional information such as number of transcripts received from an institution.
- **eCommerce:** Opt to cover transcript transaction fees for candidates.
- **Role-based Security:** Control access by defining appropriate security levels to user groups.
- **Credentials Verification:** Trust that all institutions registered on the Docufide network are proven senders of official education records.

More than 8,000 institutions use Docufide Sender to securely send transcript data from hundreds of thousands of students.

About Parchment Inc.

Parchment is the leader in electronic transcript (e-Transcript) exchange. More than 9,000 high schools (over 30 percent of the U.S. secondary school market) and postsecondary institutions have exchanged 6 million transcripts using the Docufide by Parchment[™] and Avow by Parchment[™] SaaS platforms. Beyond providing the cost and operational efficiencies of e-Transcripts, Parchment works with learners and institutions around the world to unlock the value of transcript and credential data – helping people collect, promote, and share their education credentials in simple and secure ways. Founded in 2003, Parchment Inc. is a venture-backed company headquartered in Scottsdale, AZ with offices in Roseville, CA, Washington, D.C., and Denver, CO.
